

WELCOME TO

SIMPLE-Py Workshop

Scientific Installation & Modern Packaging for Language Extensions in Python

July 13–14, 2026 · University of Minnesota, Minneapolis
Health Sciences Education Center · HSEC 2-101A/B

Day 1 · Monday, July 13

- 8:00 Breakfast
- 9:00 Welcome and overview — Henry Schreiner
- 9:10 Basic Packaging
 - Setting up for development — Henry Schreiner
 - Uv vs. Pixi: a showdown
 - Henry Schreiner vs. Matthew Feickert
 - Making a basic package — CAM Gerlach
 - Coffee break
 - Best development practices and the SP guide
 - Henry Schreiner
 - Publishing and CI — Henry Schreiner
- 12:00 Lunch
- 1:30 Intro to compiled packaging
 - A minimal compiled package with scikit-build
 - Henry Schreiner
 - Binding tools
 - Pybind11 and nanobind — Henry Schreiner
 - Maturin, PyO3, and Rust — Matt McCormick
 - Coffee break
 - Publishing with cibuildwheel — Henry Schreiner
- 5:00 Interesting topics
 - Modern Python: lazy imports — Henry Schreiner
 - Modern Python: free threading — Henry Schreiner
- 5:30 Close out day 1

Day 2 · Tuesday, July 14

- 8:00 Breakfast
- 9:00 Welcome to day 2 — Henry Schreiner
- 9:10 Deeper dive into scikit-build-core
 - Customizing the SDist and wheel
 - Stable ABI
 - Dynamic metadata — Cristian Le
 - Editable installs — Cristian Le
 - The override system — Cristian Le
 - Coffee break
- 11:00 Other tools (1)
 - Using scikit-build-core as a plugin — Henry Schreiner
 - Using pixi-build — Matthew Feickert
 - Shipping to conda-forge — Matthew Feickert
- 12:00 Lunch
- 1:30 Other tools (2)
 - Shipping to distros — Cristian Le
- 1:45 Interesting topics
 - Agentic AI in scikit-build-core's development
 - Henry Schreiner
 - Solvers (universal, time limits)
- 2:15 Reimbursement information and survey
- 2:45 Help with your projects / open hack
- 5:30 Close out
